Students who have already qualified in PGECET or GPAT are eligible to apply directly. Deadline for admissions is 4th of August 2012.

Due to the globalization and subsequent increase in outsourcing of pharmaceutical industry, the need for industry-ready pharmaceutical scientists is growing. Even though there is great pool of pharmaceutical talent, we have a big gap between pharmaceutical industry needs and skills of current pharmacy graduates. To bridge this gap, Alliance Institute of Advanced Pharmaceutical & Health Sciences (Alliance) was started in 2009 with a mission to prepare practice-ready professionals for pharmaceutical and health sciences industry. In collaboration with JNTU Hyderabad, Alliance is offering first of a kind MS programs tailored to provide pragmatic training to students seeking careers in the pharmaceutical industry. Alliance curriculum is designed by academia and industry experts and is based on Indian and International academic standards. The curriculum is taught by experienced faculty from India and abroad. Experts from major pharma companies delivers lectures on various topics related to the curriculum.

Alliance has state of the art classrooms with video conferencing facility to enable faculty from USA to teach and interact with students. Besides general laboratory equipment, Alliance lab facility includes an exclusive HPLC lab, 12 station rotary tablet press, dissolution baths and disintegration apparatus, UV Vis-spectrophotometer etc. Alliance has comprehensive library with international journal access and computer lab to support research activities by our students.

Project works of Alliance students were presented at Annual meeting of American Association of Pharmaceutical Scientists held in September 2011 (AAPS Washington DC, USA).

Students have presented their posters at 63rd Indian Pharmaceutical Congress in December 2011.

Students presented posters at MEDCHEM congress held at NIPER in February 2011.

To gain industry experience, Alliance students visit number of companies to learn different operations in pharma industry. To give our students an edge and to prepare them for the competition in the industry, Alliance also conducts Personality Development Programme to help students with communication skills, analytical & problem-solving skills, teamwork and job interviews. Most of Alliance recent graduates have successfully been placed in jobs.
